

Tooth Whitening Improves Your Smile

There are many causes of tooth discoloration; substances like coffee, cola, and smoking. Some medications and aging can also cause your teeth to stain over time. Your dentist can determine the source of your discoloration, then recommend the best whitening system for you. In most cases the results are striking!

Don't be misled by unproven and ineffective over-the-counter whitening solutions. This office dispenses a simple, safe and effective tooth whitening system that is closely monitored by our clinical staff for maximum results in the least amount of time.

Attack Plaque Bacteria With Professional Homecare & Regular Dental Visits

Plaque bacteria threatens your teeth, gums, restorative and cosmetic work; possibly even your life. Attack plaque bacteria with the Rota-dent® Professional Homecare Instrument. Rota-dent:

- Removes plaque bacteria as well as brushing and flossing.
Journal of Periodontology
- Removes plaque twice as fast as a manual brush.
Swedish Dental Journal
- Cleans surfaces between teeth better than other leading power brushes.
Journal of Clinical Dentistry

Regular recare appointments with your dental professional and daily use of the Rota-dent will help you maintain your oral health and keep your teeth whiter for a lifetime.
